TalentSync AI

Secure AI-Assisted Recruitment Management Platform

TEAM MEMBERS: Samuel Chonay • Neilia Dillon • Junnorry Fil • Josue Guerra • Devin Blake
Mentor: TBD • Instructor: Prof. Masoud Sadjadi

INFORMATION TECHNOLOGY • CAPSTONE I • SUMMER 2026

! PROBLEM

- Recruiters spend excessive time manually reviewing resumes and tracking applicants.
- Large volumes of applications make it difficult to identify the best candidates.
- Limited visibility into application status creates uncertainty for applicants.
- Communication between applicants and recruiters is inefficient and fragmented.
- Hiring lacks AI-assisted insights to support better decisions.

💡 OUR SOLUTION

TalentSync AI is a secure, AI-assisted recruitment management platform that connects applicants and recruiters in one intelligent, efficient, and user-friendly system. It automates resume analysis, streamlines communication, and provides real-time visibility throughout the hiring process.

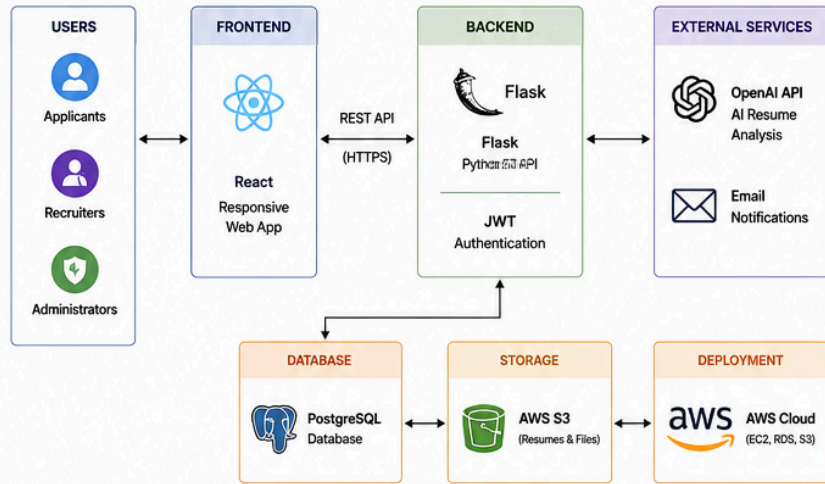

Key Design Decisions

- ✓ AI-powered resume analysis to rank and summarize candidates.
- ✓ Role-based access for secure and efficient workflows.
- ✓ Scalable cloud architecture with containerization for reliability.

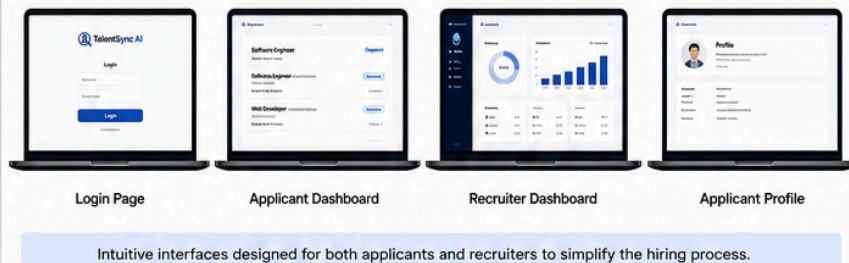

👤 KEY FEATURES

- FOR APPLICANTS**
 - ✓ Create account & build profile
 - ✓ Upload resume
 - ✓ Browse & apply for jobs
 - ✓ Track application status
 - ✓ Receive notifications
- FOR RECRUITERS**
 - ✓ Create & manage job postings
 - ✓ Review & filter applicants
 - ✓ AI-powered resume analysis
 - ✓ Schedule interviews & add notes
 - ✓ Make hiring decisions
- FOR ADMINISTRATORS**
 - ✓ Manage users & roles
 - ✓ Role-based access control
 - ✓ Audit logs & security monitoring
 - ✓ System management

SYSTEM ARCHITECTURE

USER INTERFACE WIREFRAMES

Intuitive interfaces designed for both applicants and recruiters to simplify the hiring process.

AGILE SCRUM PROCESS

PROJECT EVOLUTION (5 SPRINTS)

TECHNOLOGY STACK

RESULTS & OUTCOMES

- ✓ Defined a clear project vision and realistic solution.
- ✓ Established complete Scrum artifacts for 5 sprints.
- ✓ Designed system architecture and database schema.
- ✓ Created UI wireframes and user workflows.
- ✓ Planned secure, scalable, and cloud-ready infrastructure.
- ✓ Prepared a strong foundation for Capstone II implementation.

FUTURE WORK (CAPSTONE II)

- Implement frontend and backend
- Develop AI resume scoring & ranking
- Integrate database and APIs
- Implement authentication & security
- Deploy and perform system testing
